RE: Duke Energy Wants To Raise Rates In SC  
Duke Energy Proposes 9.3% Increase

Dear Commissioners of the Public Service Commission of South Carolina:

The economy is suffering, and especially here in South Carolina. Duke Energy must learn to adjust like the rest of the businesses have. I hope that you do not approve of this proposed 9.3% rate increase because South Carolinian are struggling enough with high unemployment rates, etc. This hardship should not be passed onto people who are jobless or simply trying to stay afloat.

Thank you for your consideration.

Respectfully,

Wendy L. Bremer
